Le Cléac'h*

## *The French Team*

*At ETF'04, the "french team" presents a system created by Marco Henry and Jean-Michel Le Cléac'h. The midrange/treble horn has been (home)made by Marco, following Jean-Michel's calculations. The bass enclosure is an isobaric load.*

*The isobaric enclosures have been discussed all this year, and were realised and evaluated during the october 16/17th audiophile week-end, organized by MELAUDIA at Rueil-Malmaison (near Paris).*

*MELAUDIA (MELomanes et AUDIophiles Associés) is a french association of melomanes and audiophiles.*
